Lab Programs for Prompting

Zero-shot, One-shot, and Few-shot Prompt Engineering using the Groq API (Free)

This notebook covers 5 lab programs demonstrating **Zero-shot**, **One-shot**, and **Few-shot** prompting techniques using a free Groq API key.

Model used: `llama-3.1-8b-instant` (Groq's free tier — fast, no credit card required)

How to get a free Groq API key:

1. Go to console.groq.com
2. Sign up / log in with Google or email (no credit card needed)
3. Navigate to **API Keys** -> **Create API Key**
4. Copy the key and paste it when prompted in the cell below

✓ Setup: Install dependencies and configure API key

```
# Install the Groq Python SDK
!pip install -q groq
```

143.7/143.7 kB 1.4 MB/s eta 0:00:00

```
from google.colab import userdata
from groq import Groq

api_key = userdata.get('groq')

client = Groq(api_key=api_key)
MODEL = "llama-3.1-8b-instant"

print("Groq client configured with model:", MODEL)
```

Enter your Groq API key:
Groq client configured with model: llama-3.1-8b-instant

```
def generate(prompt, temperature=0.7, max_tokens=600):
    """Send a prompt to the Groq API and return the generated text."""
    response = client.chat.completions.create(
        model=MODEL,
        messages=[{"role": "user", "content": prompt}],
        temperature=temperature,
        max_tokens=max_tokens,
    )
    return response.choices[0].message.content.strip()

def show(title, text):
    print(f"\n{' '*70}\n{title}\n{' '*70}\n{text}\n")
```

✓ Program 1: Product Description for a Smart Fitness Watch

Design **Zero-shot**, **One-shot**, and **Few-shot** prompts to generate a product description for a Smart Fitness Watch.

```
# --- Zero-shot Prompt ---
zero_shot_1 = """Write a compelling product description for a Smart Fitness Watch."""

zero_shot_output_1 = generate(zero_shot_1)
show("ZERO-SHOT OUTPUT", zero_shot_output_1)
```

****Introducing the Apex Fitness Tracker - Your Ultimate Personal Wellness Coach****

Unlock your full potential with the Apex Fitness Watch, a cutting-edge wearable device designed to revolutionize the way you live.

****Track Your Progress with Precision****

Stay on top of your fitness goals with the Apex Fitness Watch's advanced tracking features:

- * ****Heart Rate Monitoring****: Continuously track your heart rate and rhythm, receiving alerts for any irregularities or concerns.
- * ****GPS Tracking****: Accurately monitor your runs, walks, hikes, and other outdoor activities with built-in GPS and GLONASS capabilities.
- * ****Step Tracking****: Monitor your daily activity levels, setting reminders to stay active and motivated.
- * ****Calorie Burn Tracking****: Monitor your energy expenditure, ensuring you're meeting your calorie goals.

****Stay Connected and Informed****

Stay up-to-date with the latest news, notifications, and updates from your favorite social media platforms, email, and messaging apps.

- * ****Smart Notifications****: Receive alerts for calls, texts, emails, and social media updates, keeping you connected without the hassle.
- * ****Music Control****: Stream your favorite tunes directly from your watch, exercising to the beat without distractions.
- * ****Voice Assistant****: Activate Siri, Google Assistant, or Alexa with a simple voice command, making it easy to find answers, set reminders, and more.

****Personalize Your Fitness Journey****

Customize your experience with the Apex Fitness Watch's intuitive app, which offers:

- * ****Personalized Coaching****: Receive tailored workout plans, tailored to your fitness level and goals.
- * ****Workout Tracking****: Monitor your progress, tracking exercises, sets, reps, and weight lifted.
- * ****Goal Setting****: Set achievable targets for yourself, celebrating milestones and successes along the way.

****Enhance Your Wellness****

The Apex Fitness Watch also includes features to help you relax, recharge, and rejuvenate:

- * ****Meditation and Breathing Exercises****: Guided sessions to calm your mind and soothe your body.
- * ****Stress Tracking****: Monitor your stress levels, receiving tips and recommendations to reduce anxiety.
- * ****Sleep Tracking****: Analyze your sleep patterns, optimizing your rest and recovery.

****Experience the Power of Apex****

Join the thousands of satisfied users who've discovered the transformative impact of the Apex Fitness Watch. Upgrade your fitness today.

****Key Specifications:****

- * Water-resistant up to 50 meters
- * Battery life up to 7 days
- * Compatible with both iOS and Android devices
- * Available in multiple colors and sizes

****Upgrade Your Fitness, Upgrade Your Life****

Order your Apex Fitness Watch now and start living your best, most vibrant life.

FEW-SHOT OUTPUT
=====
Applications of Artificial Intelligence in Healthcare
```

Artificial intelligence (AI) is revolutionizing the healthcare industry, transforming the way patients receive care and clinicians practice medicine. AI-powered diagnostic tools can detect diseases earlier and more accurately than traditional methods. Moreover, AI is streamlining administrative tasks, freeing up clinicians to focus on high-value care. Machine learning algorithms are also being used to analyze large volumes of medical data, identifying patterns and insights that can improve patient outcomes.

Word count: 166

Observation: The few-shot prompt gives the model two reference blogs to imitate in tone, paragraph flow, and length, generally producing outputs closest to the requested 200-word target.

▼ Program 3: Summarize an Article into 50 Words

Design **Zero-shot**, **One-shot**, and **Few-shot** prompts to summarize an article, then compare the summaries on **accuracy**, **completeness**, and **readability**.

```
# The article to summarize (replace with any article of your choice)
article = """
Artificial Intelligence (AI) is rapidly transforming industries across the globe. In healthcare, AI-powered systems assist doctors in diagnosing diseases earlier and more accurately by analyzing medical images and patient data. In finance, AI algorithms detect fraudulent transactions in real time and provide personalized investment advice. Retail businesses use AI to predict customer preferences and optimize inventory management. Meanwhile, in education, AI-driven platforms adapt learning material to each student's pace and needs. Despite these benefits, the rise of AI also raises concerns about job displacement, data privacy, and the need for ethical guidelines to govern its use. Governments and organizations worldwide are now working to create regulatory frameworks that balance innovation with responsible AI deployment, ensuring that the technology benefits society while minimizing potential risks.

    "Summary": [zero_shot_output_3, one_shot_output_3, few_shot_output_3],
    "Word Count": [len(zero_shot_output_3.split()), len(one_shot_output_3.split()), len(few_shot_output_3.split())]
})
comparison_3
```

	Prompt Type	Summary	Word Count	
0	Zero-shot	Artificial Intelligence (AI) is transforming i...	46	
1	One-shot	Artificial Intelligence (AI) is transforming i...	48	
2	Few-shot	Artificial Intelligence (AI) is transforming i...	47	

Next steps: [Generate code with comparison_3](#) [New interactive sheet](#)

Manual Comparison (fill in after reviewing the outputs above):

	Criteria	Zero-shot	One-shot	Few-shot
	Accuracy (captures key facts of the article)			
	Completeness (covers all major points: healthcare, finance, retail, education, ethics)			
	Readability (clarity, flow, grammar)			

Typically, few-shot prompting produces the most consistent word-length adherence and structured summaries, since the model has clear examples of the expected summary format to imitate.

Program 4: Professional Leave Email due to Illness

Design **Zero-shot**, **One-shot**, and **Few-shot** prompts to generate a professional email requesting leave due to illness, then compare on **tone, grammar, formatting, and completeness**.

```
# --- Zero-shot Prompt ---
```

```
zero_shot_4 = """Write a professional email to my manager requesting leave for 2 days due to illness."""
```

```
zero_shot_output_4 = generate(zero_shot_4)
show("ZERO-SHOT EMAIL", zero_shot_output_4)
```

```
=====
ZERO-SHOT EMAIL

Please let me know if any additional documentation is required. I will make sure to catch up on any missed work as soon as I am
Thank you for your understanding and support.

Best regards,
[Your Name]

```
# --- Few-shot Prompt ---
few_shot_4 = """Write a professional email based on the examples and situation given.
```

```
Example 1:
Situation: Requesting leave for a family emergency.
Email:
Subject: Leave Request - Family Emergency
```

Dear [Manager's Name],

I am writing to inform you that I need to take leave from [start date] to [end date] due to a family emergency that requires my immediate attention. I will ensure that my ongoing tasks are handed over appropriately and will remain reachable by email for anything urgent.

Please let me know if any additional documentation is required. Thank you for your understanding.

Best regards,
[Your Name]

```
Example 2:
Situation: Requesting leave to attend a relative's wedding.
Email:
Subject: Leave Request - Family Wedding
```

Dear [Manager's Name],

I would like to request leave from [start date] to [end date] to attend my relative's wedding. I will complete my pending tasks before I leave and coordinate with the team to ensure a smooth handover during my absence.

Please let me know if you need any further information. Thank you for considering my request.

Best regards,
[Your Name]

Now write a similar professional email for:
Situation: Requesting 2 days of leave due to illness."""

```
few_shot_output_4 = generate(few_shot_4)
show("FEW-SHOT EMAIL", few_shot_output_4)
```

```
=====
FEW-SHOT EMAIL
=====
Subject: Leave Request - Medical Leave
```

Dear [Manager's Name],

I am writing to inform you that I need to take leave from [start date] to [end date] due to illness. I will ensure that my ongoing work is covered during this period.

If there are any pressing matters that need my attention, please let me know so I can make the necessary arrangements before my leave.

Best regards,
[Your Name]

Manual Comparison (fill in after reviewing the outputs above):

Criteria	Zero-shot	One-shot	Few-shot
Tone (polite, professional)			
Grammar (correctness, sentence structure)			
Formatting (subject line, greeting, sign-off, paragraphing)			
Completeness (dates, reason, handover mention, closing)			

Few-shot prompts usually yield the most consistently formatted email - including a clear subject line, structured body, and professional sign-off - because the examples explicitly demonstrate the expected format.

Program 5: Promotional Social Media Post for an AI Workshop

Design **Zero-shot**, **One-shot**, and **Few-shot** prompts to generate a promotional social media post.

```
# --- Zero-shot Prompt ---
zero_shot_5 = """Write a promotional social media post for an AI Workshop happening next month. Include relevant hashtags."""

zero_shot_output_5 = generate(zero_shot_5)
show("ZERO-SHOT POST", zero_shot_output_5)

```

Observation: Providing example posts (one-shot/few-shot) helps the model match a consistent social-media style - emojis, short punchy sentences, a call-to-action, and relevant hashtags - compared to the more generic zero-shot output.

Summary

Program	Task	Techniques Used
1	Product description	Zero-shot, One-shot, Few-shot
2	200-word blog	Zero-shot, One-shot, Few-shot
3	50-word article summary	Zero-shot, One-shot, Few-shot + comparison (accuracy, completeness, readability)
4	Leave request email	Zero-shot, One-shot, Few-shot + comparison (tone, grammar, formatting, completeness)
5	Social media post	Zero-shot, One-shot, Few-shot

Key takeaway: As we move from zero-shot -> one-shot -> few-shot prompting, the model is given progressively more context about the desired output format, tone, and structure - generally leading to more consistent, targeted, and higher-quality generations, at the cost of longer prompts.
